

RamsellPBM is a web-based data management system that manages all of the data for public health programs, whether the program is Rebate or Direct Purchase. Our technology solution is a flexible, configurable system that puts the program grantee in complete control of its data. With more than fifteen years of experience in data management, **Ramsell** can successfully tailor its system to manage all aspects of a program.

RamsellPBM Data Management System

Only Ramsell has a unique solution for every one of our clients because every program has its own requirements. No other PBM supports technology designs at the level of configuration and attention that we dedicate to each implementation.

- Real-time access to state-controlled data.
- Consistent application and tracking of state enrollment and eligibility data.
- Improved reporting capability for HRSA required data reports to include patient demographic and prescription utilization data.
- Inventory management tools and reports for direct purchase states.
- Proficient formulary management tools.
- HIPAA compliant security standards.
- Electronically-stored data improves business continuity and disaster recovery.
- Continual configuration of the system and processes to meet your needs.
- Facilitates effective and efficient program administration for states.
- Premium Payment for Medicare Part D; ensures ability for Medicaid to defer cost to Medicare.

Ramsell has been creating positive outcomes for the health and safety of underserved populations since 1964. We help organizations maximize limited resources through cost-effective coordination of care and services for complex populations managed by public health programs, education and corrections. Ramsell offers highly-configurable, web-based technology solutions, services and expertise to assist our clients in connecting people to the services they need
