FORMULARY FOR THOSE ENROLLED IN THE BRIDGING THE GAP COLORADO PROGRAM (BTGC, GROUP 38001)

For enrollees up until the catastrophic level:

All medications on the enrollee's Medicare prescription drug plan (with the exception of erectile dysfunction drugs).

For enrollees after an individual hits the catastrophic level:

The Standard ADAP Formulary

* Please note that many insurance carriers may not cover every drug that is on the Standard ADAP formulary. The carrier may also require prior authorization, or step therapy to access the drug. It is important to check with your provider to see if a particular medication is on their formulary, as Colorado ADAP is the secondary payment source, and does not guarantee access to a drug if it cannot be obtained through your insurance provider.

**If an enrollee in Colorado ADAP is denied coverage of a Hepatitis C therapy (because it is not on the insurance provider's formulary, the insurance provider states that there is insufficient medical reason to treat, or the enrollee is uninsured), the pharmacist, or treating physician is encouraged to call the ADAP Helpdesk at (303) 692-2716 to inquire about providing that therapy through the uninsured program.
