Program Dispensing Policies:

- Prescription Coverage:** The CAREAssist program will cover at full price any medication listed on the formulary, in the event that the member's insurance policy does not pay a portion of the cost. Medications not listed on the CAREAssist Formulary must be covered by the member's insurance policy in order for CAREAssist to assist with the copay.
- Brand Dispensing:** The CAREAssist program requires that pharmacies dispense generic brand medications if therapeutically equivalent to the brand drug. Brand name drugs will be covered for copayments only if covered by the primary. Brand Name ARVs preferred, Generic ARVs covered for copayments ONLY
- Vaccines** must be obtained through "no or low cost vaccine programs" whenever possible. Local county health departments and some nonprofit providers receive vaccines through the Oregon Immunization Program, targeting low income persons needing those medications. CAREAssist shall not pay for vaccines for the purpose of travel.
- OTC Medications:** Over the counter (OTC) medications listed on the formulary are available by prescription only.
- Day Supply:** Drugs marked with "•" are to be dispensed with a minimum 28 day supply for Bridge patients and 21 days for CAREAssist members.
- Prior Authorization:** Drugs marked with "A" require a prior authorization. Additional information will be required.
- ADAP mandates the use of DHHS guidelines for dispensing of Antiretroviral Agents in HIV-1 infected patients. Dosing outside of DHHS guidelines requires a Treatment Exception Request (T.E.R.).
- Excluded Medications:** CAREAssist will not cover co-pays or extend full coverage for the following medication classes:
 - Medications to treat impotence
 - Medications to treat infertility
 - Barbiturate medications (except phenobarbital)
 - Medications used primarily for cosmetic purposes (some exceptions apply)

If patient has no primary insurance or the primary insurance has denied the claim, the following applies:

- Refill Percentage:** Refills may be obtained after 70% of the previously dispensed days supply has been used.
- Quantity Limits:** An authorization request will be required when quantity exceeds 120 for DEA class II and quantity exceeds 240 for DEA class III drugs. Submit original prescription with the request.
